Career Objectives

Wish to continue career as a software engineer where skills in database systems, data processing and mathematical training can be used, with special interest in management systems (e.g. finance, e-commerce) and frontend development.

Education

- Technical Engineer in Administrative Data Processing, University of La Rioja, 2011.
- Exchange Undergraduate, University of Technology Sydney, 2009.
- Degree in Mathematics, University of La Rioja (Withdrawn in good standing.)
- International Baccalaureate Diploma, 2006.

Work Experience

January 2013 – Present, Web developer at Zanui.com.au

- Participate in the frontend and backend development of their online site solving bugs as well as implementing new functionalities. Developed their order tracking page which has consistently been in the top 10 visited pages of the site.

  Zanui is backed by European investment agency Rocket Internet.

April 2012 – October 2012, Web developer at JIG Internet Consulting S.L.

- Participated in a number of projects for leading companies in various sectors, working on both frontend (JavaScript) and backend (PHP and MySQL) development.
- Created a custom SOAP client in PHP to generate dynamic cacheable listings on demand. The library has been used in Joomla as an easily configurable plugin.
- Developed the frontend for an e-store in JavaScript + jQuery, including rich animations and drag and drop support.

May 2010 – March 2012, Developer & Innovation Consultant at Ingeniería e Innovación S.L.

IT Management

- Developed a human resource management tool that managed information of more than 75 client companies and saved the company up to 10 hours per project.
- Managed a virtualised infrastructure in VMware and led the migration of the company's Intranet from Windows to Ubuntu Linux, which resulted in a performance up to 3x faster.
- Developed an open data application for R&D projects that includes automatic syncing of internal and published data. Data is available from the company's website as well as XML.

ICT Project Management

- Composition and review of project proposals, both in English and Spanish.
- Partner search and communications for projects within the 7th Framework Programme.

Main Programming Skills

Language	Skill level	Experience
PHP	Advanced	3 years
MySQL	Advanced	3 years
JavaScript	Advanced	2 years
C++	Intermediate	2 years
Java	Intermediate	1 year
XML + XQuery	Intermediate	1 year

General Skills

Languages and Communication:

- Native Spanish speaker.
- Advanced English (TOEFL: 98/120).
- Experience in presentations and written reports under tight deadlines.

Team Work:

- Led a group of 7 students during last year at university to complete a 3-month competition with 3 other groups. The project came first at the technical level.

Personal Projects

Javiercejudo.com (March, 2013)
https://github.com/javiercejudo/javiercejudo.com
My current website, developed on top of the popular Twitter Bootstrap.

DejaVideo (November, 2012)

https://github.com/javiercejudo/DejaVideo
A responsive HTML5 video player with directory navigation and a fully configurable PHP backend.

AusNews (July, 2012)

https://github.com/javiercejudo/Australian-News
A lightweight RSS reader written in PHP that includes advanced features like instant search with Google suggestions, infinite scrolling, and unobtrusive JavaScript with graceful degradation.

SimpleWBS (May, 2011)

https://github.com/javiercejudo/SimpleWBS
An open-sourced PHP application that allows to create complex and fully documented WBS (work breakdown structures).

See more personal projects at https://github.com/javiercejudo.

Interests

I am interested in transfer of knowledge between industry and academia, and in online education. For instance, I have taken two online Stanford courses in Computer Science: Introduction to Databases (98%) and Introduction to Artificial Intelligence (93%).
